EDUCATION

DigiPen Institute of Technology

Bachelor's, Computer Science

- Valedictorian, Deans Honor List

September 2021 - April 2025

GPA: 3.97

PROFESSIONAL EXPERIENCE

Dback Solutions

Contract Software Engineer (Backend & Systems)

Remote

February 2025 - July 2025

- Developed and maintained backend microservices using C# and Node.js, optimizing logistics operations for shipment tracking, vehicle scheduling, and route optimization.
- Contributed to containerization and deployment efforts using Docker and Azure, ensuring that internal systems were scalable and accessible to dispatchers and drivers.
- Implemented basic monitoring and logging utilities to flag route conflicts and system errors, reducing manual oversight.
- Supported the integration of third-party APIs for GPS, enabling smoother fleet tracking and improving data consistency.

DigiPen Institute of Technology

Data Structures & Algorithms Teaching Assistant

Redmond, WA, USA

September 2024 - December 2024

- Facilitated the learning of foundational algorithmic concepts by delivering both group and personalized one-on-one tutoring sessions to over 30 students.
- Elevated students' algorithmic skills by assisting in the debugging, analysis, and optimization of their data structure projects, ensuring high standards through the implementation of automated tests.

DigiPen Institute of Technology

Game Implementation Techniques Teaching Assistant

Redmond, WA, USA

May 2023 - August 2023

- Enhanced student engagement and learning outcomes by working closely with the instructor to facilitate course delivery and providing tailored guidance on game implementation techniques and engine architecture.
- Enhanced students' understanding of Engine Architecture concepts by providing targeted assistance in their project implementations, fostering skill development.

DigiPen Institute of Technology

Advanced C/C++ Teaching Assistant

Redmond, WA, USA

May 2023 - August 2023

- Enhanced student understanding of C++ programming languages by utilizing strong written and verbal communication skills to explain complex design patterns and concepts, while supporting the instructor in course delivery and providing hands-on assistance during coding exercises.
- Facilitated academic success for students through a strong work ethic and problem-solving techniques, delivering constructive feedback on coding assignments that led to improved project outcomes and enhanced programming skills.

PROJECTS & OUTSIDE EXPERIENCE

Chlorofell

Gameplay & Tools Programmer / Tech Lead

Redmond, WA, USA

September 2022 - April 2023

- Developed a custom C++ engine with a Unity-like in-engine editor featuring 50+ tools, including AI blueprinting and real-time scripting, increasing prototyping speed by 30%.
- Achieved a significant boost in frame rate from <10 FPS to 100+ FPS by rewriting the rendering pipeline, enhancing visual performance.
- Achieved a 30% increase in design team productivity by engaging with cross-functional teams using agile methodologies to develop solutions that empowered designers and artists, showcasing strong communication skills and a collaborative approach.

Cloud File Server

Backend & Frontend Full-Stack Developer

Redmond, WA, USA

February 2024 - April 2024

- Enhanced user experience and data security by developing a cloud-based file hosting service with OAuth2-based user authentication, utilizing CI/CD practices, and ensuring efficient database management with SQL.
- Enhanced operational efficiency by leveraging containerization and microservices in the design of a scalable architecture and cloud infrastructure, supporting file upload, access control, and deletion through an API.

Remanence

UE5 Gameplay Programmer

Redmond, WA, USA

September 2023 - December 2024

- Enhanced player experience by 30% through the design and implementation of immersive combat mechanics and a dynamic save system with modular expansion.
- Increased player engagement by 25% by collaborating with designers to enhance gameplay mechanics through effective gameplay balancing.
- Achieved a 50% FPS increase on low-end machines through rigorous performance optimizations and profiling techniques as part of an initiative to enhance gameplay performance.

SKILLS

Skills: C/C++, Python, C#, Node.js, Microsoft Azure, AWS, Docker, Git, Data Structures & Algorithms, MySQL, Version Control, SVN, Web Services, Visual Studio, Game Development, Linux/Unix, GitHub/GitLab, Web Development
